PROFILE

A **Gold Medalist** Full-Stack Developer with **3+ years of experience** in **React, Next.js, Node.js, NestJS, and PostgreSQL**, including 2 years building production systems serving 100K+ users. Skilled in creating clean, intuitive UIs and architecting robust backend systems. Focused on **system design, distributed patterns**, and integrating **AI-driven features** into real-world SaaS applications.

EDUCATION

Capital University of Science and Technology, Islamabad

2019 – 2023 | Islamabad

BS Computer Science

Gold Medal 

EXPERIENCE

Leed Software Development 

05/2023 – Present | Islamabad

Full Stack Developer

Tech Stack: React, Next.js, Node.js, NestJS, PostgreSQL, Prisma, MQTT, Rust (Shopify Functions), AWS

- Developed full-stack features across internal and international client applications.
- Designed backend APIs, optimized database queries, and maintained scalable architectures.
- Built and maintained frontend UIs in React/NextJs with clean, reusable components.
- Collaborated with a 10-person Agile team, participated in code reviews, and handled technical discussions with US-based clients.
- Provided ongoing production support, merchant assistance, and feature planning for live SaaS products.
- Delivered backend modules powering **10K+ active devices** for a U.S. digital-wellness platform.
- Led engineering on a **Shopify checkout rules app**, serving **80K+ merchants**.
- Developed multi-role dashboards for a property listing platform, enhancing workflow efficiency for Admins, Agents, and Users.

Freelance

06/2022 – Present | Remote, Pakistan

Full-Stack Developer

Tech Stack: React, Next.js, NestJS, Node.js, PostgreSQL, MongoDB, Prisma, Redis, BullMQ, AWS, Docker

- Delivered end-to-end full-stack solutions for local and international clients, covering planning, development, deployment, and long-term support.
- Built a workflow and invoice automation system for a printing press with real-time job tracking and streamlined daily operations.
- Developed the backend for AreekaWeb, a therapy consultation platform, enabling scalable session management and reliable background processing.
- Implemented real-time, bi-directional communication using WebSockets for instant state updates across clients.
- Handled client communication, requirement refinement, production deployments, and iterative improvements using Agile-style collaboration.

PROJECTS

BeSure Checkout Rules App [🔗](#)

10/2024 – Present

Tech Stack: React, Node.js, GraphQL, PostgreSQL, Prisma, Rust (Shopify Functions), Crisp, Gleap AI

Contributed as a **full-stack engineer** on a production Shopify app that enables merchants to create **conditional checkout rules**. Worked as a core full-stack contributor in a 4-person team, handling **React-based frontend, Node.js/PostgreSQL backend, GraphQL integrations**, and **Rust-based Shopify Functions**. Participated from the app's early development phase, implementing new features, improving performance, and ensuring compatibility within Shopify's restricted Functions environment. Collaborated in **Agile sprints**, contributed to planning and feasibility discussions, and evaluated the impact of new features on existing merchant setups. Provided **live merchant support** to help users configure rules, analyzed feature requests, and **wrote clean, optimized and lightweight code** to reduce bundle size and improve loading speed.

MakaanSaz – Property Listing Platform

06/2024 – 10/2024

Tech Stack: React, Next.js, Node.js, PostgreSQL, Sequelize ORM

Backend Engineer in a 4-person team. Designed **APIs and database schemas from scratch** using **Node.js, Sequelize ORM**, and **PostgreSQL**. Integrated backend with a **Next.js dashboard** and collaborated with QA for smooth deployment.

Techless – Wisephone Platform [🔗](#)

06/2023 – 06/2024

Tech Stack: React, Node.js, PostgreSQL, MQTT, Redis, BullMQ

Contributed to the **Platform Team** of Wisephone, a digital-wellness smartphone ecosystem, working alongside a 10+ person cross-functional team. **Developed backend APIs** used by the Android device team, Admin Portal, and Parent Portal, enabling secure sync of device data such as messages, call logs, media, and usage activity. Worked on the **Admin Portal** for device activation, IMEI registration, subscription management, and app configuration, as well as the **Parent Portal**, which provides real-time synced data and remote controls for linked devices. Delivered full-stack features across **Node.js, PostgreSQL/Prisma**, and **React**, participated in **Agile sprints**, and contributed to planning, technical discussions, and architectural decisions throughout the project lifecycle.

AreekaWeb – Therapy Consultation Platform [🔗](#)

01/2025 – 09/2025

Tech Stack: NestJS, PostgreSQL, Prisma, Redis, Docker, AWS

Worked with international teams, including partners from France, to build a full-stack tele-consultation platform enabling patients to connect with licensed therapists through virtual sessions, chat, and subscription plans. Contributed from the project's early phase by designing the **database schema**, structuring backend services in **NestJS**. Integrated **Redis caching, BullMQ** for background job processing, and deployed staging and development environments on **AWS EC2**. Built secure APIs powering the mobile/web clients and the **Admin Portal**, which manages therapists, payouts, session data, and platform-level configurations. Ensured clean, optimized code, participated in architecture discussions, and supervised production-level testing to deliver reliable releases on time for the client.

TiwanaConnect – Family Connect Platform [🔗](#)

04/2025 – Present

Tech Stack: NextJs, NestJS, PostgreSQL, Prisma, Redis, Docker, AWS, Cloudflare, Vercel

Building a platform to manage family data using **Next.js, NestJS, PostgreSQL, Neo4j** and mobile App in **React Native**. The project is in development, and I am building it independently while following industry standards. GitHub [🔗](#)

EXPERTISE

Frontend

- ReactJS
- NextJS
- React Native
- Tailwind CSS / ShadcnUI
- Custom UI Components

Backend

- Node.js / Nest Js
- PostgreSQL / MongoDB
- Prisma / Drizzle ORM
- Rust
- Redis / BullMQ / Kafka

Infra & DevOps

- Docker
- Github Actions
- AWS- EC2 / S3
- Vercel / Cloudflare
